

# Adaptation Scotland

supporting climate change resilience

## The Benchmarking Tool – Supporting and Assessing Progress against the Adaptation Capability Framework

KE4CAP March 2021

The Adaptation Scotland programme is funded by the Scottish Government and delivered by sustainability charity Sniffer.

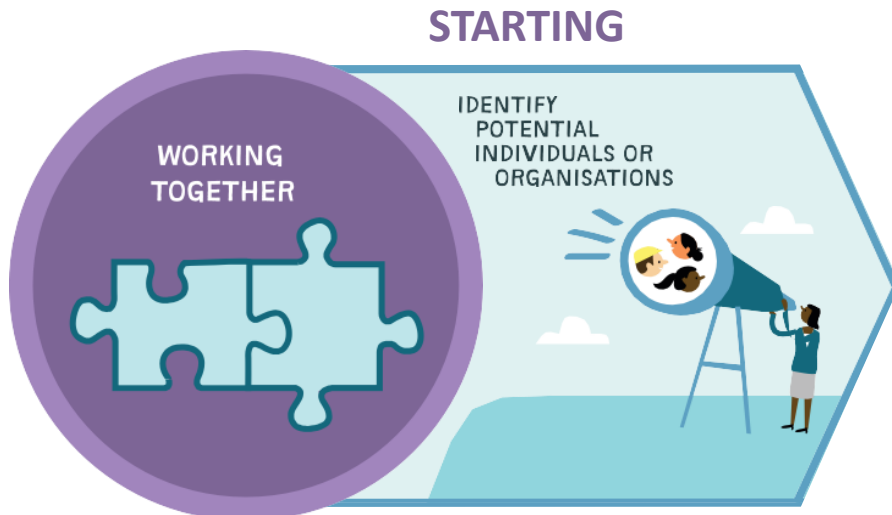

Ellie Murtagh, Climate Adaptation Services Specialist

1. Overview of the Adaptation Capability Framework
2. Introduction to the Benchmarking Tool
3. Description of the Benchmarking Working Group
4. Lessons learnt, challenges and opportunities

- An organisation has adaptation '**capability**' that determines its ability to deliver climate adaptation. This is multi-faceted, comprising four adaptation capabilities:

## MATURITY STAGES:

An organisation can develop adaptation capability over time.

ADAPTATION CAPABILITY FRAMEWORK

## MATURITY STAGE: STARTING

Your organisation is able to communicate why adaptation matters by linking it to your strategic objectives. You have considered where adaptation fits in your organisation and identified key opportunities to begin your adaptation work – as well as what resources are available to support it.

### OC1A Consider how adaptation fits with your organisation and its objectives

Identify how adaptation supports delivery of your organisation's strategic objectives. Use this to communicate why adaptation matters. You will need to consider where adaptation is best placed in your organisation and start to identify relevant groups and decision making processes.

### OC1B Identify resources available for adaptation

Adaptation is a long-term process that will see you undertake many tasks requiring a range of different resources – human, physical, financial, information and intellectual. It is useful to survey resources that already exist within your organisation that will enable you to plan and deliver future work.

## MATURITY STAGE: INTERMEDIATE

Your organisation is now prepared to work on adaptation. Leadership has put in place governance arrangements and committed suitable resources to progress with your initial adaptation plans. There is an emerging set of people in your organisation who can see opportunities to deliver adaptation – and may become adaptation 'champions'.

### OC2A Secure resources to plan and deliver adaptation

Your organisation will need committed resources – human, physical, financial, information and intellectual – to progress with adaptation. You need to secure those needed for short-term activities, but also resources for longer-term needs. Consider both internal and external sources.

### OC2B Engage with colleagues to identify adaptation opportunities and potential 'champions'

Your organisation will (or could) be delivering adaptation through many of its functions. By actively engaging colleagues across your organisation you can identify opportunities to include adaptation in planned work – as well as key people who could become adaptation 'champions'.

### OC2C Establish governance arrangements for adaptation

Setting up governance arrangements for adaptation is essential to enable effective decision-making and collaborative delivery across your organisation. Seek approval for an option that works for your organisation – and is able to deliver your adaptation objectives.

## MATURITY STAGE: ADVANCED

Your organisation now has governance arrangements in place to deliver adaptation. You are systematically identifying opportunities to include adaptation in plans, policies and procedures. These opportunities are being taken up by emerging adaptation 'champions' across your organisation.

### OC3A Identify opportunities to include adaptation in plans, policies and procedures

Take a systematic look across the breadth of your organisation's functions to identify opportunities to include adaptation in plans, policies and procedures. Think about where you can make the most impact, but also look beyond the 'obvious' to areas that may not have considered climate adaptation.

### OC3B Motivate 'champions' and actively promote adaptation across the organisation

Your organisation should openly promote an adaptation agenda both internally and externally. Seek to recognise and empower adaptation 'champions', individuals who can lead the way in your organisation by setting goals, and advocating and resourcing initiatives on adaptation.

### OC3C Put governance arrangements for adaptation into operation

An on-going effort is required to implement your approved adaptation governance arrangements. Good governance will provide oversight for a work programme, defines roles and responsibilities, and will have appropriate authority to approve and implement change.

## MATURITY STAGE: MATURE

Your organisation delivers a broad range of action on adaptation, which is now being mainstreamed into many plans, policies and procedures. Your governance arrangements are kept up-to-date and are able to reflect changing demands as more people become involved. There is a supported network of 'champions' who continue to lead the way on adaptation.

### OC4A Mainstream adaptation into your organisation's plans, policies and procedures

You can reduce reliance on stand-alone adaptation actions (often seen as a burden) by mainstreaming into your organisation's functions. Prioritise actions that will deliver most impact, but also embed adaptation considerations within review/update cycles for a wide range of plans, policies and procedures.

### OC4B Develop a network of recognised adaptation 'champions'

As more people become actively involved in delivering adaptation across your organisation, it is important to continue to recognise, support and – to avoid silos – coordinate those who are leading the way as adaptation 'champions'. By developing a formal or informal network you can create space for communication and encourage peer support.

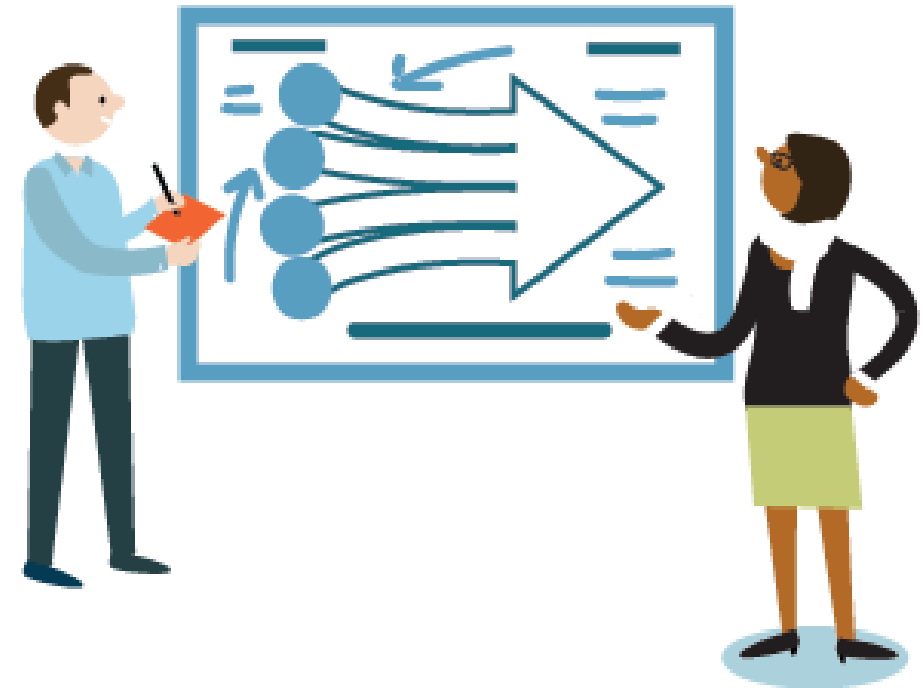

### OC4C Review and update governance arrangements for adaptation

Your organisation should periodically review, reflect on and update governance arrangements for adaptation. This will help you take opportunities that arise and account for changing demands as adaptation progresses – as well as respond to any wider changes taking place in your organisation.

	Starting	Intermediate	Advanced	Mature
<b><u>Organisational Culture &amp; Resources</u></b>	<b>OC1A</b> Consider how adaptation fits with your organisation and its objectives	<b>OC2A</b> Secure resources to plan and deliver adaptation	<b>OC3A</b> Identify opportunities to include adaptation in plans, policies and procedures	<b>OC4A</b> Mainstream adaptation into your organisation's plans, policies and procedures

			<b>WT3D</b> Join networks and link with peer organisations	<b>WT4D</b> Take a lead in networks and peer organisations

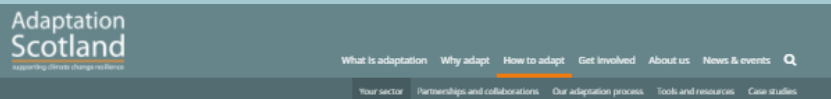

- The aim of benchmarking is to:
  - Describe your organisation's current adaptation capabilities and provide a baseline from which progress may be measured
  - Identify your current organisational position within the Adaptation Capability Framework
  - Illustrate what you've already done on adaptation and highlight where improvement is needed
  - Provide a way to understand and track ambitious change
  - Support project planning

- The benchmarking tool aims to assess the adaptation progress of an **organisation** not an individual employee, team or department.
- It should reflect the current progress on adaptation of your organisation as a whole and should be contributed to by a number of teams, sectors and departments.

# Accessing the Benchmarking Tool

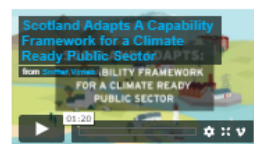

## Public sector

The public sector has a crucial role to play in enabling Scotland to adapt to climate change. Taking a strong, proactive approach will ensure that vital public assets, infrastructure and services are fit for current and future generations and able to deliver positive outcomes across society.

The public sector is subject to legislative duties that require action to adapt and report progress. It also has a unique leadership role in driving action and influencing change across society.

Our tools and resources are based on a strong understanding of public sector needs. The resources below have been developed in collaboration with professionals who are leading adaptation action across Scotland's local authorities, health boards, universities and government agencies. We have also drawn inspiration from adaptation research, tools, and resources from around the world (download our reference list [here](#)).

Take a look at the resources below and contact us if you have feedback or questions.

### Handbook

The Handbook is an introduction to climate change adaptation for Scotland's public sector. The public sector has already shown a willingness to take on a leadership role when it comes to action on climate change. The Handbook provides an overview of how the Adaptation Capability Framework can be used by any public sector organisation to accelerate action on adaptation. It introduces the Adaptation Capability Framework, and outlines the four capabilities that an organisation will need to develop to progress adaptation.

[Download handbook](#)

### Framework

The Adaptation Capability Framework identifies four capabilities that every public organisation will need to adapt to climate change, providing step by step tasks to guide your adaptation journey. Organisations will have different levels of maturity, and the Framework allows you to identify where you are on your adaptation journey, and how you can develop each capability. The Framework is easy to navigate, allowing you to tailor your approach to your organisation's unique circumstances.

[View framework](#)

### Starter pack

An introduction for organisations beginning their adaptation journey and a resource for advanced organisations to review and revisit earlier work. It provides specific support to the starting stage tasks.

[Get started](#)

### Benchmarking

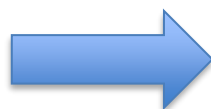

A tool for organisations at any stage on their adaptation journey to benchmark progress on adaptation, identify strengths and weaknesses, and track the impact of actions.

[Learn more](#)

### Training and support

Ongoing training and support to help you understand your organisation's vulnerability to climate risk, and how to progress your organisation's adaptation journey.

[Learn more](#)

Home > How to adapt > Your sector > Public sector > **Benchmarking**

## Benchmarking

The Benchmarking Tool helps illustrate an organisation's adaptation journey. It should be used to provide a baseline assessment of your organisation's current adaptation capabilities and how their development progresses over time. It highlights which capability areas the organisation is excelling at and others where more work may be needed. It can aid communication and engagement to show what your organisation is aiming for and the steps needed to get there.

The Benchmarking Tool aims to assess the adaptation progress of an organisation NOT an individual employee, team or department. The tool, therefore, may need to be completed by you or a small group of colleagues initially and then finalised through discussions with management and/or different departments.

The aim of benchmarking is to:

- Describe your organisation's current adaptation capabilities and provide a baseline from which progress may be measured
- Identify your current organisational position within the Adaptation Capability Framework
- Illustrate what you've already done on adaptation and highlight where improvement is needed
- Provide a way to understand and track ambitious change
- Support project planning

**The Benchmarking Tool was revised following user feedback and updated August 2020. Download the latest version [here](#).**

Adaptation Scotland hosts a Benchmarking Working Group to support public bodies in using the Adaptation Capability Framework and benchmarking progress. Find out more about the group's members and activities [here](#).

Organisation Sector:

City/Region:

Reporting Period:

Current Period:

Current Year:

Reporting Period:

Annually

Current Period:

Quarterly  
Bi-Annually  
Annually

Current Year:

Organisations consider what maturity they are currently at for each capability by comparing to description of each maturity stage

## Maturity Stage: I. STARTING

Description of how capability is displayed by organisation at this stage:

Progress Level:

Your organisation is able to communicate why adaptation matters by linking it to your strategic objectives. You have considered where adaptation fits in your organisation and identified key opportunities to begin your adaptation work – as well as what resources are available to support it.

How accurately does the description of an organisation at that maturity stage reflect your current organisational situation? Please provide an assessment on a scale of 0-3 where 0 indicates your organisation does not display or illustrate any of the traits or characteristics described in the summary box at all and 3 meaning that your organisation currently matches the description provided accurately.

Annually	2020	2021	2022	2023
Score				

# Assess progress against tasks

Task Code	Task Description	Is this task relevant for you?	Are processes in place to undertake task?	Start Date (Optional)	Resource Required (Optional)	Tasks Required (Optional)	No. Days Required (Optional)
OC2A	Secure resources to plan and deliver adaptation			dd.mm.yy			
OC2B	Engage with colleagues to identify adaptation opportunities and potential 'champions'			dd.mm.yy			
OC2C	Establish governance arrangements for adaptation			dd.mm.yy			

Yes	Your organisation has established processes and ongoing actions for this task
Partly	Some initial efforts have been taken towards the identified task but more work is required
No	You have not started or considered this task

# Record further detail on progress against tasks

## Evidence to justify progress

## Learning (what worked well and what could be better)

## Other thoughts / comments for each individual task

# Benchmarking Working Group

- **Collective group actions:**
  - Bi-annual working group meetings
  - Thematic Workshops
  - Monthly Drop-In Calls
- **Individual Member activities:**
  - Quarterly Reflective Learning Reports
  - Submission of Completed Benchmark Assessments

# Reflective Learning

## What are the key principles of using a learning log?

- **Record information AND impressions** - This log should be a space to compile information on activities, tangible things like what happened and what was done, but it also offers the opportunity for you to reflect on your impressions and feelings.
- **Complete it regularly** - Written inputs should be made throughout the process not 'in one go' at the end. The Working Group agreed that members record entries at least once a month.
- **Be timely and honest** - Try and record entries close to the time of the event so that your recollection or reflection is not distorted or influenced by time and all the important aspects are captured openly and truthfully.
- **Make it personal** - A learning log contains your record of your experiences, thoughts, feeling and reflections. There is no right or wrong answer. Results will be unique to you. Remember all findings will be anonymised

### TEMPLATE [copy and paste table for each entry]

Time frame for diary entry: (DD/MM/YEAR – DD/MM/YEAR)

**Activities/ Events:** In relation to adaptation activities describe what happened, who/ what was involved, and what you did over the past month (or since your previous learning log entry).

*[Please consider the following questions for each activity/ event if relevant]*

**Motivations:** Why did you do this? What were you aiming to achieve and why is this important (on a personal and organisational level)? If these activities explicitly aimed at developing a capability or task from the framework please identify this.

**Outcomes:** Did this lead to anything tangible? *[e.g. identifying next steps, specific outputs such as new materials or evidence developed]*

**Your views:** How did it go? What went well and what didn't? Why?

**New insights:** Did this event or activity provide any new insights/ understandings?

**Informing your activities:** Will these insights be useful to inform your future activities? How?

**Enablers and Barriers:** What internal or external processes/stakeholders/decisions have aided OR restricted your adaptation activities and why?

**Additional considerations:** Do you feel anything else could have helped influence this activity/ event to better contribute to developing your organisation's adaptation capabilities?

- Many organisations have had **resources (staff and financial) for adaptation diverted/reduced due to COVID**
- **Shared frustrations** of not being able to report more adaptation progress in Public Bodies Climate Change Reporting Duties
- Multiple members noted that they **felt they and colleagues are ‘speaking different languages’** in relation to climate change, however found tips from Susanne Moser’s workshops useful in addressing
- Activities ongoing to provide **updates on Benchmarking progress at SMT/ Leadership Team/ Climate Change Group meetings to keep adaptation ‘on the agenda and radar’ of senior colleagues**
- **Engaging and collaborating with other public bodies was highlighted as beneficial for identifying joint projects and learning from each other**
- **Adaptation champions** in various forms being established – sustainability pioneers, climate champions

# Case Study Example – Forestry and Land Scotland

- Figure out what is right for your organisation. The Framework is comprised of 50 tasks – it is important to realise you do not have to hit every single one of them straight away. **Take time to consider what your organisation has already done on adaptation (and celebrate that), understand your organisational objectives and adaptation aims and figure out which capability tasks support you to get there. Undertaking a Benchmarking workshop helps identify what is relevant for your organisation and helps track progress over time.**

- Let colleagues know what you are doing – provide regular updates. Be honest in benchmarking. **It's OK to find out that your organisation hasn't already made much progress – the important thing is to ensure that you're heading in the right direction from where you are now.**

Forestry and  
Land Scotland  
Coilltearachd agus  
Fearann Alba

The Council has joined Adaptation Scotland's Benchmarking Working Group comprising a group of public sector organisations actively using their adaptation capability framework and benchmarking adaptation progress, developing case studies and sharing good practice in order to improve climate adaptation strategies in Scotland.

SFRS have utilised the materials and support provided by Adaptation Scotland to assess and benchmark the Service's maturity against the Adaptation Capability Framework. The Service has undertaken the Strategic Climate Change Risk Assessment to evaluate the vulnerability of SFRS to climate risks and to outline mitigation measures.

**East Dunbartonshire  
Council**

#### 2(b) How is climate change action managed and embedded by the body?

Provide a summary of how decision-making in relation to climate change action by the body is managed and how responsibility is allocated to the body's senior staff, departmental heads etc. If any such decision-making sits outside the body's own governance arrangements (in relation to, for example, land use, adaptation, transport, business travel, waste, information and communication technology, procurement or behaviour change), identify how this is managed and how responsibility is allocated outside the body (JPEG, PNG, PDF, DOC)

Climate change action continues to be strategically encouraged across the organisation via the annual Business Improvement Planning (BIP) production process. The BIP Corporate Guidance document, which requires all services to document their plans for addressing climate change, was refined during 18/19 to allow more meaningful information to be gathered; this included asking services to identify potential negative impacts as well as positive ones. The checking process for draft BIPs was also improved, allowing better identification of issues to address in the following year.

As previously reported, the Council's Policy Development Framework has served as another mechanism for strategically encouraging climate change considerations to be embedded into new (policy-related) activities, including through the Strategic Environmental Assessment (SEA) process. During 18/19, work continued in relation to the review of Policy Development Framework and re-naming it as the Impact Assessment Guide, for approval early in the 19/20 reporting year. These changes were undertaken to provide a clearer, more streamlined system and to strengthen provisions throughout the process of policy development and approval.

The CMOG continued to provide a further governance/decision-making mechanism in 18/19, with key services across the Council collaborating to record and reduce carbon emissions. The 'Healthy Environments' group, established between the Council and the East Dunbartonshire Health and Social Care Partnership during 17/18, continued to operate in 18/19, providing a forum for partners to collaborate on issues spanning the climate change and health agendas, including active travel and nature-based solutions to mitigation and adaptation.

At the Glasgow City Region level, the Council participates in and contributes financially towards the Climate Ready Clyde partnership, co-ordinated by Sniffer and hosted by Clydeplan. Climate Ready Clyde plays an important role in promoting collaboration between public sector bodies on adaptation and promoting a shared agenda to address adaptation within the City Region. The partnership is also represented on the Land Use and Sustainability Portfolio Group of Glasgow City Region, which is led by East Dunbartonshire Council. This provides a key link between the work of the partnership and of Glasgow City Region, facilitating consideration of the climate change adaptation issues in relation to key investment decisions in the City Region. During the reporting year, the close relationship between Climate Ready Clyde and the City Region's Land Use and Sustainability Portfolio Group was illustrated by the Council's Chief Executive giving a keynote speech at the launch event for the Climate Ready Clyde Risk and Opportunity Assessment, and his involvement in the launch event for Adaptation Scotland's Adaptation Capability Framework.

- **Benchmarking process enables engagement within an organisation to understand and plan adaptation action**
- The assessments and working group feedback **highlights where organisations require further assistance and where Adaptation Scotland can support**
- **Outstanding need to consider alignment of M & E at different scales – including intervention, organisation and national level**

# Thanks!
