*UN CC:Learn is a partnership of more than 30 multilateral organizations supporting countries to design and implement systematic and results-oriented climate change learning. With our partners across the UN system and in our partner countries, we promote capacities to ensure continuous and strategic approaches to the provision of knowledge and skills.*

## Global Level

At the global level, the partnership supports knowledge-sharing and the dissemination of common climate change learning materials. It also coordinates training interventions through collaboration of UN agencies and other partners, contributing to a growing critical mass of professionals and individuals with the necessary understanding of the basics of climate change to inform their decisions and take effective action.

The Secretariat for UN CC:Learn is hosted by the United Nations Institute for Training and Research (UNITAR). Funding for UN CC:Learn is provided by the Swiss Government and UN partners.

## National Level

At the national level, UN CC:Learn supports countries in addressing learning priorities relevant to their National Determined Contributions (NDCs) and National Adaptation Plans (NAPs), through the development and implementation of climate change learning strategies, in collaboration with national education and training institutions. By 2020, UN CC:Learn aims to engage with 25 countries.

# Key Results

## Global and National Levels

Global knowledge-sharing market place for climate change learning providing all the latest and best offers from the UN system

Regional climate change learning strategy launched in the Central American Integration System (SICA), which includes eight countries

**USD**  
**3.85 million**

leveraged from national or international sources for further implementation of the national climate change learning strategies.

**+100,000**

Registered participants from 195 countries using our free e-learning platform offering learning materials on many different climate change topics

**9**

national climate change learning strategies

BENIN

BURKINA  
FASO
